

Please look at this when your AirPods charging box is full of scratches

AirPods charging box is incredible just like a oval; however, with time passes by, it would be full of scratches and not shinny as before.

INTRODUCTION

Clean the scratches by yourself.

TOOLS:

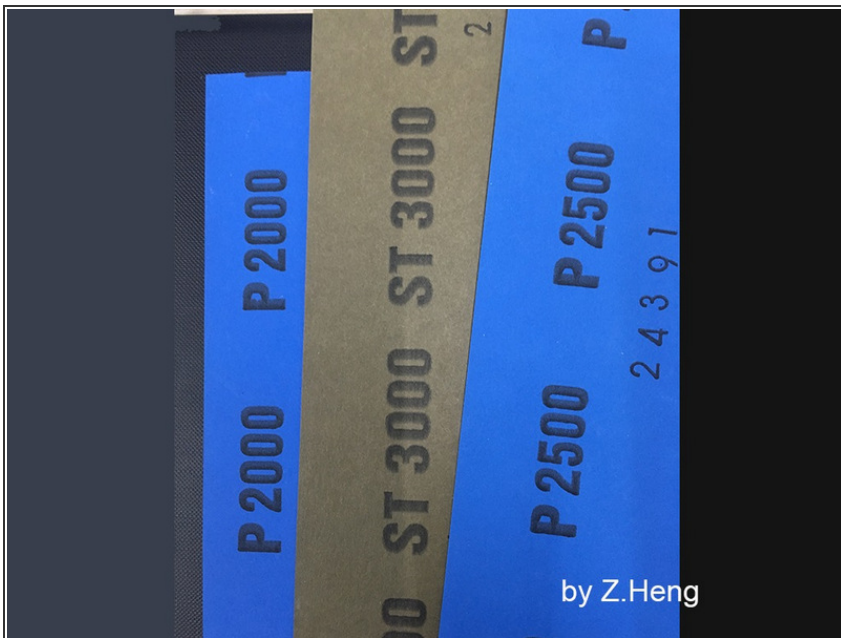

- [New Item](#) (1)
 - [New Item](#) (1)
 - [New Item](#) (1)
-

Step 1 — Please look at this when your AirPods charging box is full of scratches

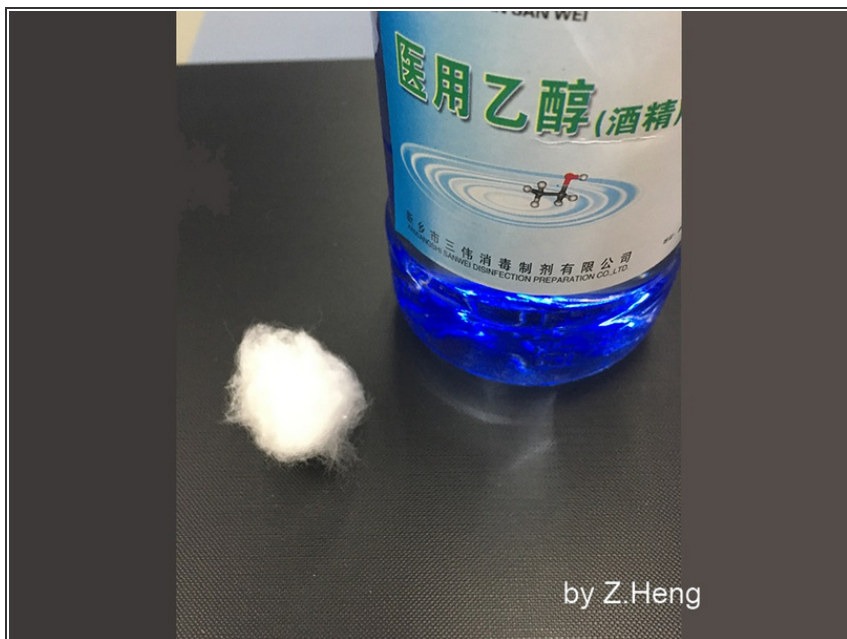

- Both sides are full of scratches.

Step 2

- Use ultra-fine sandpapers (About P2000). I first used P2500 and then P3000 sandpapers.

Step 3

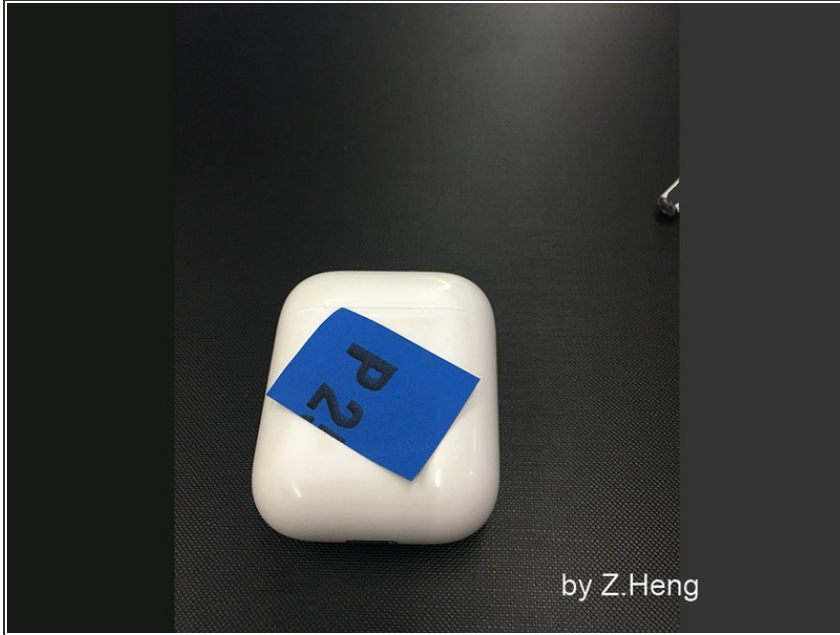

- After that, you have to use cotton and alcohol to clean the surface of the charging box.

Step 4

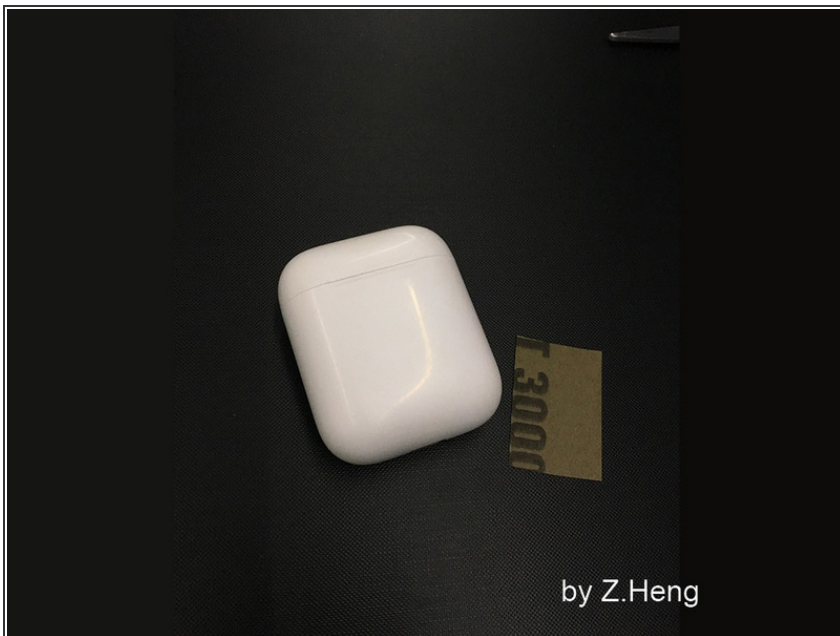

- Use cotton and alcohol clean the surface of the charging box.
- Also clean the inside.

Step 5

- Wet the surface by cotton and alcohol (or water), and use P2500 sandpaper to polish the surface in circles.
- You can see that most of the scratches look smooth now. Shiny surface becomes matt.
- ① According to the specific situation, you can conduct this step for several times.

Step 6

- It's clean now, but it also looks matt.
- ① If you love the fog style, you have finished.
- But if you prefer the shiny surface, use P3000 sandpaper and conduct step 5.
- ① Sandpaper above P3000 could be better.

Step 7

- Now, you have finished.

The charging box would be as new as you just buy it.
